

Chiara

Francesco Binfaré

General description:

Elegant and convenient, thanks to the "intelligent" cushion used for the backrest. Structure in tubular steel and extrusions. Coverings available in fabric, velvet or leather in the colors of the collection.

The pedestal enabling the swivel system is a cruise of steel extrusions and sections, brushed and finished in glossy chrome-plated nickel.

Versatile and pure. Individual, also available together with a footrest that allows you to stretch your legs for the ultimate relaxation. Timeless, contemporary classic since birth.

The "smart" cushion used as backrest can be inclined in any direction, forward or backward, allowing exceptional comfort. Elegance. Simplicity. Maximum comfort. A chair that has these characteristics. Universal value, pure and absolute.

Always current, a perfect match for any style of decor.

The polished metal base reflects the surface on which it rests, like a mirror. The visual effect is that the chair appears almost suspended in the air.

Technical description:

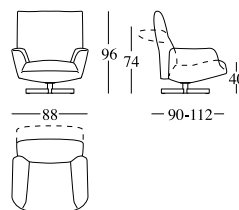

Armchair and footrest, inner frame in tubular and steel sections, padding in flexible polyurethane foam, Gellyfoam® and synthetic wadding.

The base with four-spoke profiles and steel turned parts is finished in brushed nickel polished chrome and enables the pivoting system.
