

Margherita

Jacopo Foggini

General description:

Impressive, important and at the same time visually light, thanks to the polycarbonate. Tall and swiveling, with rounded lines and slender shape. The body, made entirely by hand, rests on a cone-shaped pedestal, enabling the swivel system. Available in four colors: gold, amber, kermes red and aquamarine blue. Precious like an embroidery. Protective like a nest. The pedestal is made of brushed steel in different finishes: shiny gold for gold and amber, with real 24 carat gold finish, polished chrome for kermes red, ruthenium color for aquamarine blue. Extraordinary for its ability to play with light, assumes different shades and shines when placed near light sources.

Technical description:

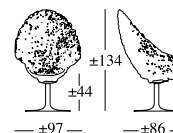

Armchair composed of a body in hand-shaped polycarbonate, in gold, amber, kermes red and aquamarine blue.

The pedestal, in brushed steel in different finishes ruthenium, polished steel and gold, enables the swivel system.
