**TOBIASGRAU**

COLLECTION

designed by tobias grau

Hochwertige Leuchten in bester Lichtqualität zu entwerfen und zu bauen – das ist unser Bemühen und unsere Leidenschaft.

Hierzu ist heute eine intensive Auseinandersetzung mit neuen Techniken und die Berücksichtigung ökologischer Aspekte notwendig. Für das Design ergeben sich so ganz neue Möglichkeiten und Notwendigkeiten.

Nach der Einführung der Halogenniedervoltbeleuchtung vor 20 Jahren hat sich nun mit der LED-Technik eine noch weitergreifendere Veränderung der Lichtbranche ergeben. Leuchtenformen, Leuchtmittelwechsel, Stromverbrauch und gerade die Lichtqualität – alles ist in Bewegung. Man muss aber wissen, LED ist nicht gleich LED. Ausschlaggebend für die Lichtqualität ist neben der richtigen Lichtfarbe auch der sogenannte Farbwiedergabe Index CRI – Colour Rendering Index.

Halogen-Glühlampen verbrauchen viel Strom und halten nicht lange. Sie machen aber immer ein tolles Licht. LEDs verbrauchen im Vergleich viel weniger Strom und halten extrem lange. Aber nur LEDs mit höchster Farbwiedergabe – und nur diese verwenden wir für unsere Wohnraumleuchten – machen ein vergleichbar gutes Licht. Die Stromverbrauchsreduktion ist so groß, dass man von einem Paradigmenwechsel sprechen kann. Man wird zukünftig nicht mehr nach „Watt“ fragen und dann auf die tolle Leistung schließen, sondern umgekehrt denken: „So viel Licht, also so viele Lumen, mit so wenig Strom!“ Im Vergleich zu den zur Zeit als Ersatz propagierten Energiesparleuchtmitteln sparen LED-Leuchten zwar keinen Strom, aber mit entsprechend hochwertigen LEDs ausgestattet machen sie ein besseres Licht und halten länger.

Für den Wohnbereich haben wir mit LEDs neues Design realisiert – mit Formen, Materialien und in Größen, die mit herkömmlichen Lichtquellen nicht möglich wären, z.B. LEED, FALLING, CASINO, FALLING STAR und FALLING IN LOVE. Bestehende Leuchten haben wir technisch für LEDs neu konzipiert und so den Stromverbrauch gesenkt, bzw. die Lichtqualität erhöht, z.B. bei der Schreibtischleuchte BILL. Mit dem Leuchtenprogramm MONEY haben wir ein altes Thema, die „gute alte Schirmleuchte“, für LED-Technik entwickelt. Kaum Stromverbrauch, kaum Wärmeentwicklung, wunderbares Licht!

Für den privaten Bereich wird aber auch die Halogentechnik weiterhin wichtig sein. Gerade kleine leistungsstarke Strahler kann man heute am besten mit Niedervolthalogen bauen; so haben wir gerade den NAME SPOT mit neuen Oberflächen aktualisiert und das TUBE Programm für bessere und leistungsstärkere Niedervolthalogenleuchtmittel umgerüstet.

Was bei aller Veränderung immer gleich bleibt, ist die eigentliche Herausforderung ein so technisches Produkt wie eine Leuchte am Ende immer auch sinnlich zu gestalten und das ist eher eine Frage des Gefühls, nicht des Verstandes.

Designing and building premium luminaires that produce top-quality light is not only our aim, it's our passion too. Today that means intense involvement with new technologies whilst paying equal attention to ecological aspects. This results in totally new possibilities and necessities for the design.

Following the introduction of low-voltage halogen lighting 20 years ago, LED technology is having an even more far-reaching impact on the lighting industry. Luminaire shapes, light source replacement, power consumption and especially the light quality – everything is changing. However, it is also important to realise that not all LEDs are the same. Apart from the right colour, the so-called Colour Rendering Index (CRI) plays a decisive role in determining the quality of the light. Light bulbs use a lot of electricity and don't last long. But they always make great light. LEDs use much less electricity than light bulbs and last an extremely long time. But only LEDs with a very high colour rendering index – and they're the only ones we use for our domestic luminaires – produce light of comparable quality. The energy saving is so huge that you could call it a paradigm shift. In future, instead of asking about the "wattage" and then concluding the performance must be great, we will think the other way round: "So much light, i.e. so many lumens, with so little electricity!" As compared to the energy-saving light sources that are currently being propagated as a substitute, LED lamps might not save electricity, but if they're equipped with top-quality LEDs they produce a much better light and last a lot longer.

LEDs have enabled us to create a totally new kind of design for home lighting – with shapes, materials and sizes that wouldn't be possible with conventional light sources, e.g. LEED, FALLING, CASINO, FALLING STAR and FALLING IN LOVE. We've redesigned the technology of our existing lamps for LEDs and thus not only lowered their power consumption but improved the light quality too, as with e.g. the BILL desk lamp. With our MONEY collection we've reinterpreted "good old shaded lamps" for LED technology. Extremely low power consumption, hardly any heat generation, wonderful light!

However, halogen technology will continue to be important for the private segment. In particular, low-voltage halogen is definitely the best option for small, powerful spotlights; we've just updated the NAME SPOT with new finishes and modified the TUBE range for better and more powerful low-voltage halogen light sources.

But despite all these changes, there's one thing that always stays the same: the real challenge lies in designing a highly technical product like a luminaire in such a way that the end result is always sensuous as well – and that's a question of feeling rather than logic.

#### Neue Entblendungstechnik

Mit unserer Entwicklung der Entblendungstechnik OSA – open structure antiglare – für die GO XT und XT-A Leuchten ist uns ein Durchbruch bezüglich des Lichtkomforts bei der Bürobeleuchtung gelungen.

Während eine übliche Metallrasterentblendung – insbesondere bei Bürostehleuchten – optische Nachteile haben und prismaent-blendete Leuchten eine viel zu hohe Helligkeit am Leuchtenkopf aufweisen, sind alle unsere Büroleuchten mit OSA-Technologie ausgestattet. Eine große Anzahl lichttechnisch optimierter, parabolisch geformter Öffnungen schaffen eine optimale Leuchtdichte am Leuchtenkopf ( $400\text{--}900\text{ cd/m}^2$ ), bieten dem Benutzer eine komfortable Lichtwahrnehmung und wirken weniger ermüdend.

Mit dem gleichen Ziel haben wir das XT SPOT + DOWNLIGHT Programm entwickelt, bei dem wir durch weiter zurück liegende Leuchtmittel ebenfalls eine stärkere Entblendung der Leuchten als üblich erreicht haben.

#### Neue Sensortechnik

Ein hoher Komfort sowie ökologische und ökonomische Effektivität sprechen eindeutig für den Einsatz von Sensorleuchten:

Ein integrierter Konstantlichtregler sorgt immer für die richtige Lichtmenge; zusammen mit einem ebenfalls integrierten Bewegungsmelder sinkt nicht nur der Stromverbrauch um bis zu 50%, sondern es verringern sich auch die Installationskosten, da auf eine zentrale Schaltung und Steuerung des Lichts verzichtet werden kann.

Aus diesen Gründen haben wir unsere XT-A Bürostehleuchten immer mit einer eigens neu entwickelten Sensorsteuerung ausgestattet, die sich vor allem durch eine präzisere Erfassung auszeichnet. Eine optimierte Nachlaufzeit und eine Komplettabschaltung reduzieren den Stromverbrauch und erhöhen die Lebensdauer der EVGs und Leuchtmittel. Acht verschiedene Modi können an der Leuchte eingestellt werden – so kann z.B. der Bewegungsmelder abgeschaltet werden oder die Nachlaufzeit verlängert werden. Dadurch kann auf objektbezogene Bedürfnisse vor Ort reagiert werden. Durch die große Variabilität der Leuchte kann eine eventuelle Umrüstung – mit dem dann angepassten Modus – jederzeit unkompliziert an der Leuchte ohne zusätzliche Kosten erfolgen.

#### Stehleuchten mit extrem niedrigem Stromverbrauch

Um die heute teilweise sehr ehrgeizigen Vorgaben an den Stromverbrauch bei Bauvorhaben zu erfüllen, haben wir zusätzlich zu einem kompakten Stehleuchtenkopf einen neuen, sehr langgestreckten Leuchtenkopf für Leuchtstoff entwickelt. Nicht nur das Ergebnis war verblüffend gut, sondern gleichzeitig schien uns die Bauform auch perfekt geeignet für die Konstruktion einer LED-Büroleuchte. Die so entstandenen XT-A LONG Leuchten eignen sich – je nach Ausführung – für die normgerechte Ausleuchtung von ein bzw. zwei Arbeitsplätzen. Bei den LED Varianten kann man den direkten und den indirekten Lichtanteil getrennt voneinander schalten.

Bei gleicher Effizienz, harmonischerem Farbspektrum und niedrigeren Wartungskosten im Vergleich zu Leuchtstoff sehen wir im LED Licht trotz heute höherer Anschaffungskosten auch im Bürobereich eine große Zukunft.

#### New deglaring technology

Our development of OSA deglaring technology (open structure antiglare) for the GO XT and XT-A luminaires represents a breakthrough in office lighting comfort.

Whereas conventional metal grid deglaring has visual disadvantages – especially in the case of office floor lamps – and luminaires with a deglaring prism are much too bright around the lamp head, all our office luminaires are equipped with OSA technology. A large number of optimally engineered parabolic openings create the optimal luminance at the head of the lamp ( $400\text{--}900\text{ cd/m}^2$ ). This ensures the light is perceived as comfortable and has a less tiring effect.

We developed the XT SPOT + DOWNLIGHT range with the same goal in mind and achieved stronger deglaring than usual by inserting the light sources deeper into the luminaires.

#### New sensor technology

The high degree of convenience combined with ecological and economic effectiveness make sensor-controlled lighting a highly attractive option.

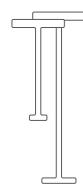

An integrated constant light controller ensures there is always the right amount of light, combined with an integrated motion detector, this not only reduces power consumption by up to 50%, it reduces installation costs as well because there is no need for a central switching and control system.

That is why we have always equipped our XT-A office floor lamps with a new, specially developed sensor control with unusually precise detection properties. An optimised off delay and the complete shut down mode reduce power consumption and increase the lifespan of the ECUs and light sources. Eight different modes can be set on the luminaire – the motion detector can for instance be turned off or the off delay extended, enabling the user to respond to situation-specific needs. Thanks to the great variability of the luminaires, straightforward modification with the adapted mode is possible at any time and generates no additional costs.

#### Floor lamps with extremely low power consumption

In order to meet the sometimes very ambitious power consumption specifications for construction projects, we developed a new, very elongated lamp head for fluorescent light sources in addition to the more compact head for our floor lamp. Not only was the result amazingly good, the design also seemed perfectly suited to the construction of an LED office lamp. Depending on the variant, the resulting XT-A LONG luminaires are ideal for illuminating one or even two workstations in line with the applicable standards. And with the LED variants, the direct and indirect lighting components can be operated separately.

As compared to fluorescent lighting, LED is just as efficient, has a more harmonious colour spectrum and makes for lower maintenance costs. Even though the purchase costs are higher – at least for the time being – LED light has a great future in the office segment too.

Zink, Glas, Edelstahl und Teakholz – für unsere Außenleuchten verwenden wir nur Materialien, die den Witterungsbedingungen von Winter bis Sommer standhalten und darüberhinaus in Würde altern und eine angenehme Patina bekommen.

Die robusten, archetypischen Formen der einzelnen Leuchten geben dem Programm einen eigenen unverwechselbaren Charakter.

Zinc, glass, stainless steel and teak – our outdoor lights are made exclusively of materials that can withstand the weather from winter to summer, aging with dignity and developing an attractive patina.

The robust, archetypal forms of the individual luminaires give the collection its own, very distinctive character.

Ein Kreis, ein Quadrat – Kreise im Quadrat, endlos gereiht – der Gedanke ist ganz einfach, neu und wird Programm.  
Alles geht ohne die sonst übliche aber einengende Rahmenbauweise. Schalten und Dimmen sollte unkompliziert sein. Es muss sich von selbst erklären.

XT PLUG & DIM ist unsichtbar mit neuster Technik ausgestattet und erlaubt den vielfältigen Einsatz für sogenannte Standardinstallationen bis hin zu

Kleinschutzspannungsinstallationen.

Letztere auch mit der Möglichkeit der Ansteuerung von Bus-Systemen.

Bei der Planung hilft verständlich, schnell und übersichtlich ein Konfigurator im Internet. Mit diesem kann die individuelle Zusammenstellung für jede einzelne Schalterkombination und für jeden Raum erfolgen.

A circle, a square – circles in a square in infinite rows – the idea is very simple, very new and sets the agenda.

Anything is possible – without the usual but restricting frame structure. Switching and dimming should be straightforward. It must be self-explanatory. XT PLUG & DIM is invisibly equipped with the latest technology and permits versatile usage for so-called standard installations all the way to safety extra-low voltage installations. The latter also permits the control of building management systems (BUS systems).

Our online configurator is a clear, quick and easy to understand planning tool that allows you to determine the individual arrangement of every single switch combination for every single room.

STANDARDINSTALLATION SCHALTEN + DIMMEN 230V | STANDARD INSTALLATION SWITCH + DIM 230V

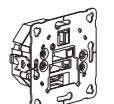

**TASTDIMMER + TASTSCHALTER | FLUSH-MOUNTING DIMMER + SWITCH** PD00-0 105,04 125,00

für Glühlampen 230V, 60 – 525W u. elektronische Trafos 60 – 525VA. Zu verwenden als Tastschalter, Dimmer, Treppenhaus schalter, programmierbarer Zeitschalter u. mit dem Funkempfänger Aufsatz. Nicht geeignet für Leuchten mit EVG.  
230V for incandescence bulbs, 60 – 525W + electronic transformers 60 – 525VA. Settable by function selector switch with 8 functions: touch dimmer with memory, switch ON/OFF, staircase switch, programmable timer adjustable brightness and radio waves receiver button. Not suitable for lighting with electronic ballast.

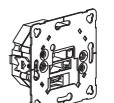

**TASTDIMMER + TASTSCHALTER | FLUSH-MOUNTING DIMMER + SWITCH INSERT** PD00-1 62,18 74,00

für Glühlampen 230V, 60 – 600W u. konventionelle Trafos 60 – 500VA. Zu verwenden als Tastschalter, Dimmer, Treppenhaus schalter, programmierbarer Zeitschalter u. mit dem Funkempfänger Aufsatz. Nicht geeignet für Leuchten mit EVG  
230V for incandescence bulbs, 60 – 600W and conventional transformers 50 – 500VA. Settable by function selector switch with 8 functions: touch dimmer with memory, switch ON/OFF, staircase switch, programmable timer adjustable brightness and radio waves receiver button. Not suitable for lighting with electronic ballast.

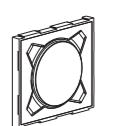

**TASTSCHALTER | FLUSH-MOUNTING PUSHBUTTON RELAY BASE** PD00-3 64,70 77,00

Relais Einsatz 230V, 50Hz, 3 Leiter-Anschluss; Schaltleistung: 1 Relaisausgang,  $\mu$ 10A; Glühlampen 230V 2300W; Hochvolthalogen 230V 1500W; Trafos u. induktive Lasten 600VA; Einschaltstrom 80A/20ms, 3 EVGs à 58W; zu verwenden als Tastschalter, Tast-Impulstaster, Treppenhaus schalter, programmierbarer Zeitschalter u. mit dem Funkempfänger Aufsatz  
Supply voltage 230V, 50Hz, 3-lead connection; switching capacity: 1 relay output,  $\mu$ 10A; Filament lamps 230V 2300W; High voltage halogen lamps 230V 1500W; Transformers and inductive loads 600VA; Inrush current max. 80A/20ms, 3 electronic ballasts 58W each; settable as pushbutton switch ON/OFF, touch-impulse button, staircase switch, programmable timer and radio waves receiver button.

## LEUCHTMITTEL | LIGHT SOURCES

Leuchtmittel sind im Bereich HOME immer im Lieferumfang enthalten – anders bei den OFFICE und OUTDOOR Leuchten, bei denen sie zumeist separat bestellt werden müssen.

Unsere Leuchten werden mit dem jeweils stromsparendsten Leuchtmittel ausgestattet. Dieses senkt den Stromverbrauch bei gleicher Lichtleistung.

Bei allen mitgelieferten und zu bestellenden Leuchtmitteln achten wir darauf, Ihnen nur ausgewählte Qualitätsprodukte mit möglichst langer Lebensdauer und höchster Lichtqualität zu liefern.

The luminaires from our HOME segment are always delivered with the light sources included – in contrast to our OFFICE and OUTDOOR lamps, for which they usually have to be ordered separately.

Our luminaires are equipped with the most energy-saving light source available. This lowers power consumption without affecting brightness.

Whether the light sources are supplied with the lamp or ordered separately, we make every effort to ensure you always receive select quality products with as long a life as possible and top-quality light.

## LED AUSTAUSCH | LED REPLACEMENT

Die Lebensdauer von Leuchtdioden, sogenannten LED's ist sehr lang; so lang, dass ein sonst üblicher Leuchtmittelwechsel entfällt.

Trotzdem sind unsere LED-Leuchten immer mit jederzeit auswechselbaren LED's ausgestattet.

Auf alle LED's gewähren wir eine Garantie von 5 Jahren.

Light-emitting diodes, or LEDs for short, have an extremely long life expectancy – so long, in fact, that they do not need replacing like conventional light sources.

Even so, our LED luminaires are fitted with LEDs that can be replaced at any time.

We give a 5-year guarantee on all LEDs.

| G9 <b>ECO:</b> | 60W | 980lm | warm white | 1A | BM67-1 | 3,28 | 3,90 |

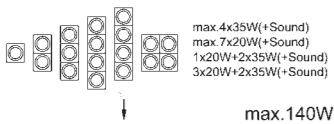

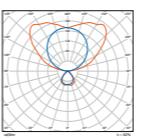

|  |  |      |   |
|--|--|------|---|
|  | Schutzklasse 2   protection class 2  |      | Auch geeignet für den Einsatz von Kompakteuchtstofflampen E27 / max. 20W (nicht im Lieferumfang enthalten).   Also suitable for use with E27 type compact fluorescent lamps / max. 20W (not included in the delivery)   |
|  | Schutzklasse 3, Leuchte wird ohne Transformator geliefert. Betrieb nur mit elektronischen Transformatoren   protection class 3, fixture delivered without transformer. Use with electronic transformers only.  |      | ECO steht für energieoptimierte Leuchtmittel, d.h. Leuchtmittel mit z.B. 35W Leistung, haben die gleiche Lichtstärke wie ein Standard 50W Leuchtmittel gleicher Bauweise. ECO Leuchtmittel haben i.d.R. eine doppelt so lange Lebensdauer wie Standard Leuchtmittel. Informationen darüber, welche anderen ECO Leuchtmittel bzw. Standard Leuchtmittel Sie in dieser Leuchte verwenden dürfen, finden Sie in der Montageanleitung der Leuchte.   ECO stands for energy-optimised light sources, i.e. light sources with an output of 35W have the same brightness as a standard 50W light source of the same type. As a rule, the lifespan of ECO light sources is twice as long as that of standard light sources. You will find information about what other ECO light sources and/or standard light sources can be used in this luminaire in the assembly instructions |
|  | Montage auf normal entflammbar Flächen zulässig   Suitability for direct mounting on normal flammable surfaces.  |      |   |
|  | Montage auf normal entflammbar Flächen nicht zulässig   No suitability for direct mounting on normal flammable surfaces.   |      |   |
|  | Keine Wärmeisolierung über die Leuchten legen!   Do not put insulation above the lights!   | (1)  | Lieferung mit längerem Kabel/Seil auf Wunsch möglich.   Delivery with longer cable/wire possible on request.  |
|  | Geprüft und zertifiziert nach europäischer Leuchtnorm EN 60598.   Inspected and certified according to european lighting standards EN 60598.   | (2)  | FALLING STAR - Lieferung mit längerem Kabel:   FALLING STAR - Delivery with longer cable:   |
|  | Mindestabstand zu angestrahlten Flächen ...m!   Minimum distance from lighted objects ...m!  |      |   |
|  | Niederdrucklampen verwenden!   Use low pressure lamps  |      |   |
|  |  |      |   |
|  | 1 Schalter in der Leuchte integriert.   Integrated switch in the fixture.  | (3)  | Einbau in schräge Decken unzulässig   Installation in sloping roofs not allowed   |
|  | 2 Zweistufenschaltung in der Leuchte integriert.   Two-phase switch integrated in the lamp.  | (4)  | Montageelemente für schräge Decken auf Anfrage.   Mounting units for sloping roofs on request.  |
|  | Leuchte nicht dimmbar.   Lamp not dimmable.  | (5)  | Leuchte nicht an externen Dimmer anschließen, da dadurch die Leuchte beschädigt werden kann.   Do not connect the luminaire to external dimmers as this can damage the luminaire.   |
|  | Dimmer in der Leuchte integriert.   Dimmer integrated in the lamp.   | (6)  | Leuchte ist mit einem elektromagnetischen (Ringkern) Transformator ausgestattet. Beim Dimmen der Leuchte kann es zu Brummgeräuschen kommen. Diese sind technisch bedingt und stellen keinen Grund zur Reklamation dar.   The luminaire is equipped with an electromagnetic (ring core) transformer. Humming noises may occur when the luminaire is dimmed. These noises are due to technical aspects and do not constitute grounds for complaint.   |
|  | Leuchte wird mit Schnurzwischendimmer geliefert.   Lamps supplied with in-line dimmer.   | (7)  | Abweichungen in der Lichtstärke und dem Weißton der verwendeten LEDs sind herstellungsbedingt und kein Grund für eine Beanstandung.   Deviations in the brightness and white shade of the LEDs used are production-related and do not constitute grounds for complaint!   |
|  | Dimmer für Halogen-Hochvoltleuchten verwenden.   Use dimmers for halogen high-voltage lamps.   | (9)  | Transformatoren nicht im Lieferumfang enthalten. Elektronische Transformatoren mit Kurzschlussabschaltung verwenden!   Transformer not included in delivery. Use electronic transformers with short circuit   |
|  | Dimmer für Halogen-Niedervoltleuchten mit elektronischen Transformatoren verwenden.   Use dimmers for low-voltage halogen lamps with electronic transformers.  | (10) | Die angegebene Leistung ist die Systemleistung der Leuchte (LED+Konverter). Die Lichtleistung der LED wird über die Lumenzahlen (lm) angegeben. LED Leistungen lassen sich nicht mit Leistungsangaben von z.B. Halogenlampen vergleichen!   The output stated is the system output of the luminaire (LED+converter). The light output of the LED is stated in lumens (lm). LED outputs are not comparable with the output specifications of e.g. halogen bulbs!   |
|  | Dimmer für Halogen-Niedervoltleuchten mit elektromagnetischen (Ringkern) Transformatoren verwenden. Hinweis: wir empfehlen den Dimmer 6560U der Firma Busch-Jaeger (BX00-0). In jedem Fall können Brummgeräusche entstehen.   Use dimmers for low-voltage halogen lamps with electromagnetic transformers. Note: we recommend the 6560U dimmer from Busch-Jaeger (BX00-0). Humming noises may occur. | (13) | Bei 240V Netzspannung nur schaltbar, nicht dimmbar.   With 240V house current, can be switched but not dimmed.  |
|  | Phasenabschnitt-Drehdimmer mit Druckausschalter und Leistungsbereich ab 20W verwenden. Dimmung nur von 40%-100% möglich. Wir empfehlen den Tobias Grau XT PLUG&DIM Dimmer PD15-x.   Use a trailing edge rotary dimmer with push-on/push-off switch and an output range starting at 20W. Dimming only possible from 40%-100%. We recommend the Tobias Grau XT Plug&Dim Dimmer PD15-X.                 | (15) | Leuchtmittel GU5,3 10° verwenden.   Use luminous substance GU5,3 10°.   |
|  | Leuchte kann mit (Unterputz)-Taster gedimmt und geschaltet werden (switchdim). Hierzu benötigen sie ein 4-poliges Kabel (2XL/1XN/1XPE). 1-10V oder DALI Vorschaltgeräte auf Anfrage.   Lights can be dimmed and switched with flush switches (switchdim). A 4 pole cable (2XL/1XN/1XPE) is required. 1-10V or DALI electronic ballast on request.  | (17) | Lampen getrennt schalt-/dimmbar, wenn zweiphasiger Netzzanschluss vorhanden. Bei getrennter/gemeinsamer Dimmung, auf geeignete Dimmer achten.   Lamps are switched and dimmed separately if 2-phase house current is available. With separate/common dimming, take care that dimmer is suitable.  |
|  |  | (18) | Wandmontage nicht zulässig.   Wall mounting not allowed.  |
|  |  | (19) | Bei Einguss in Beton bitte folgende Eingussdosen verwenden: BX06-0 (Kaiser Halo-X-O 1290-40+1290-49) bzw. BX06-1 (Kaiser Halo-X-O 1290-41+1290-49).   When pouring in concrete, please use the following filling doses: BX06-0 (Kaiser-Halo-X-O 1290-40+1290-49) or BX06-1 (Kaiser Halo-X-O 1290-41+1290-49).   |

- (21) Bodenmontage nicht zulässig Für Bodenmontage FREE PILLAR verwenden. | Not suitable for floor mounting. For floor mounting, please use FREE PILLAR.
- (22) Bei Erdmontage GROUND ANCHOR verwenden. GROUND ANCHOR kann eingegraben oder einbetoniert werden. | For ground mounting use Ground Anchor. Ground Anchor can be dug or cemented into the ground.
- (23) Für dieses Produkt können sie folgende elektronische Transformatoren verwenden. | You can use the following electronic transformers with this product
- |                         |        | excl.  | incl.  |
|-------------------------|--------|--------|--------|
| 50 W - 12V/220-240V     | BX05-4 | 30,25  | 36,00  |
| 105 W - 12V/220-240V    | BX05-1 | 32,77  | 39,00  |
| 150 W - 12V/220-240V    | BX05-7 | 49,58  | 59,00  |
| 210 W - 12V/220-240V    | BX05-0 | 63,87  | 76,00  |
| DC300 W* - 12V/220-240V | BX06-6 | 178,15 | 212,00 |
- \*DC300W Transformatoren für 12V Leitungslängen bis max.12m. | DC300W transformers for 12V powercircuits up to 12m.
- (24) Sonderlängen auf Wunsch möglich. | Special lengths available on request.
- (27) Leuchte wird mit Multiwatt-EVG geliefert, d.h. es können wahlweise 2 Lampen mit einer der genannten Leistungen mit diesem EVG betrieben werden. Ein Mischbetrieb mit Lampen verschiedener Leistungen ist nicht zulässig! | The luminaire is supplied with multiwatt electronic ballast. This electronic ballast can be used to operate 2 lamps with the mentioned power. Mixed operation with various lamps is not permissible!
- (28) Jede NAME TRACK, auch bei Reihung der Stromschienen, muß mit je einem Paar SUSPENSION montiert werden. | Every NAME TRACK, even when several tracks are combined, must be mounted with one pair of SUSPENSION.
- (29) Pro Schienenende wird je ein Paar NAME ELYPSE benötigt. | One pair of NAME ELYPSE is required for each track end.
- (30) Nur bei geraden Decken verwenden. Bei schrägen Decken bitte NAME TRAFO CLASSIC CABLE verwenden. | Only use with level ceilings. With sloping ceilings, please use NAME TRAFO CLASSIC CABLE
- (31) Zwei elektronische Transformatoren speisen je einen Stromkreis in der Schiene. Bei 2-phasigem Netzanschluss können die Transformatoren getrennt geschaltet/gedimmt werden, bei 1-phasigem Netzanschluss nur gemeinsam. | Two electronic transformers each supply one circuit in the track. With 2-phase mains power, the transformers can be switched/ dimmed separately, with 1-phase mains power only jointly
- (33) Lieferung inklusive zwei Paar ELYPSE. | Delivery includes two pairs of ELYPSE.
- (34) Kein tragendes Element. | Not a supporting element.
- (36) Innen-/Außenleuchte | Indoor/outdoor lamp
- (38) Alle OMM SQUARE Elemente können miteinander kombiniert werden unter Berücksichtigung der Einbauhinweise | All OMM SQUARE units can be combined with one another if installation instructions are followed.

### OMM SQUARE 35

- (47) Dimmbare Leuchte kann mit (Unterputz)-Taster gedimmt und geschaltet werden (switchDIM). Hierzu benötigen Sie ein 4-poliges Kabel (2xL/1xN/1xPE) Dimmable Lights can be dimmed and switched with flush switches (switchDIM). A 4 pole cable (2xL/1xN/1xPE) is required.
- (48) Leuchten können auf Wunsch auch mit 1-10V oder DALI EVG geliefert werden. | The luminaires can also be supplied with 1-10V or DALI ballast on request.
- (49) Leuchten können auch mit Sensortechnik ausgestattet werden. Längen und Preise auf Anfrage. | The luminaires can also be equipped with sensor technology. Lengths and prices on request.
- (50) Leuchten können auch in anderen Längen und Leistungen geliefert werden. | The luminaires are also available with different lengths and outputs.
- (52) Als Aufbau- und Einbauvariante verwendbar. | Can be used surface-mounted or recessed.
- (54) Diese Leuchte kann nur mit Spedition versandt werden. Bitte erfragen Sie die für die Lieferung anfallenden Frachtkosten. Speditionskosten werden von uns grundsätzlich, auch bei Erreichen der Frachtfreigrenze, berechnet. | This luminaire can only be shipped via a haulage contractor. Please enquire about the freight costs incurred for delivery. Haulage costs will be charged even if the carriage free threshold is reached.
- (55) Leuchten mit dem Zusatz /EUROTRACK passen in alle markt-üblichen 3-Phasen Hochvoltstromschienen. | Lamps with the additional notation / EUROTRACK fit all conventionally 3-phase mains-voltage tracks.
- (56) - Leuchtenkopf 2x45° drehbar.  
- In Leuchtenkopf integrierte Stellschraube zur Feinjustierung der horizontalen Leuchtenkopfausrichtung.  
- Pivotable luminaire head (2x45°).  
- An adjustment screw is integrated in the luminaire head for fine adjustment of the horizontal head alignment.
- (57) - Sensor: Konstantlichtregelung und Bewegungsmelder zur Energieeinsparung von bis zu 50% im Vergleich zu einer ungeregelten Leuchte.  
- Optimale, normgerechte (EN12464-1) Entblendung unter 1000cd/m² durch OSA-Technologie, dadurch extrem hoher Sehkomfort.  
- Sensor: constant light control and motion sensor for an energy saving of up to 50% compared to an uncontrolled luminaire.  
- Optimal deglaring (in line with the EN12464-1 standard) under 1000cd/m² thanks to OSA technology, therefore extremely comfortable for the eyes
- (58) Folgende Lichtszenen sind an der Leuchte über den ersten Taster einstellbar:  
- LED Direktstrahlend  
- LED Direkt-/Indirektstrahlend  
- LED Indirektstrahlend  
- Jede Lichtszene ist über den zweiten Taster schalt-, bzw. dimmbar.
- The following lighting scenes can be set on the luminaire using the first button:  
- Direct LED light  
- Direct/indirect LED light  
- Indirect LED light
- Each lighting scene can be switched on and off or dimmed using the second button.

Weitere lichttechnische Daten finden Sie unter [www.tobias-grau.com](http://www.tobias-grau.com) oder im DIALux Online-Plug-In | For further lighting planning data see [www.tobias-grau.com](http://www.tobias-grau.com) or DIALux Online-Plug-In

- (39) Montage in Betondecken nicht möglich | Mounting in concrete ceiling not possible.
- (43) Jede GO TRACK SMALL, auch bei Reihung der Stromschienen, muss mit zwei Aufhängungen montiert werden. | Each GO TRACK SMALL must be mounted with two fixtures even when several tracks are combined.
- (44) GO TRACK SMALL wird immer von der Decke abgehängt montiert. Die Öffnung zeigt bei dieser Schiene Richtung Decke und ist somit dem Betrachter entzogen. | GO TRACK SMALL is always suspended from the ceiling. The opening of this track faces towards the ceiling and is thus obscured from view.
- (45) Nur bei geraden Decken verwenden. | Only for level ceilings.
